

LINCOLN THEATRE

ALWAYS A GOOD SHOW.

Week days doors open afternoons at 1:45, show starts at 2:15 and 4:00. Evenings doors open at 6:45, show starts 7:15 and 9:00. Saturdays and Sundays continuous. Show starts 2:15, 4:00, 5:45, 7:30 and 9:15.

Next Week's Pictures

Sunday and Monday—

WALLACE REID in

"THE HELL DIGGERS"

The many admirers of Wallace Reid will not be disappointed in this, his latest offering, which strikes an original note in an unusual phase of gold-digging in the west. Also Chapter No. 12 of "Breaking Through," and one of those screaming comedies, "The Heart Breakers."

Tuesday and Wednesday—

TOM MIX in

"THE NIGHT HORSMAN."

One of the greatest of Tom's undertakings, in which he lives up to his reputation. Also Buster Keaton in "The Playhouse," and "Topics and Review." This is one of the biggest bills of the season at this popular theatre.

Thursday and Friday—

WM. de MILLE'S production of

"THE LOST ROMANCE."

A story of a million married lives yearning for the vanished thrill of sweetheart love. "Ruth of the Rockies," No. 12 and the Pathe News.

Saturday—

HERBERT RAWLINSON in

"THE SCRAPPER."

A pleasing offering of this star in the character of a regular he man. A two reel comedy, "The Strap Hangers," and funny Snub Pollard.

Monday, Tuesday, Wednesday,

"THE SHEIK."

This book is the Year's Sensation. You'll Never Forget the Picture.

BEES AND THE GARDEN

Honey-makers Gather the Sweet
From Blossoms.

Do Excellent Service in Carrying Pollen From One Plant to Another—They Are Worth While.

Honey bees—two or three hives of them—will prove a valuable investment to the back yard gardener. Most back yards have enough small fruit trees, flowers and blossoming vegetables to provide attraction for the bees. They are among the busiest invaders

Homes of Honey Bees.

of the growing vegetation, and there are not many blossoms which they will pass by—and, at the same time, they carry the pollen from one plant to another. This is absolutely necessary, in some way, to cause the plants to produce. When bees and birds do not carry the pollen from one plant to another about the only other chance is for the wind to perform the service. Let the bees do this important duty whether they are honey or other kinds of bees.

GET THE BUGS EARLY

Garden May Be Destroyed Unless Insects Are Killed.

Generous and Frequent Sprays Are Necessary to Insure Returns to Industrious Gardener.

One of the principal of the numerous slogans of the successful cottage gardener is "Get the Bugs—and Get 'Em Early!"

Unless the bugs are killed before they have time to breed, the gardener has about as many troubles as he has when he has neglected the weeds.

The majority of young plants are infested with different kinds of bugs. Flowers usually are as badly affected

Spraying Young Plants.

as vegetables. The United States Department of Agriculture says:

One of the principal methods of combating both diseases and insects which attack plants is treatment with fungicides and insecticides.

Bordeaux mixture is used for a control of fungous diseases of many vegetables and fruits and as a deterrent of flea-beetle attack. It can be purchased in convenient package form from seed dealers or prepared at home from bluestone (copper sulphate), which costs 10 to 25 cents per pound, and fresh stone or lump lime (quicklime).

Bluestone, four ounces; quicklime, four ounces; water, 12 quarts. Or bluestone, four pounds; quicklime, four pounds; water, 50 gallons.

Dissolve the blue stone in a wooden or earthenware vessel, using hot water. Dilute with half the water. Do not use in tin or other metal containers, as they would be spoiled. Strain the lime by adding water, a little at a time. When reduced to a milky fluid, dilute with the rest of the water and strain through doubled cheesecloth or a brass wire strainer of 18 meshes per inch and pour into it the bluestone solution. Stir well and apply at once. This is best when prepared fresh for each using.

SANDY AND CLAY SOIL

The chief virtue of sandy soil, says the United States Department of Agriculture, is that the roots of plants can pass through it readily; its chief fault is that it dries out too quickly. Clay soil holds water well, but it tends to pack and harden. Both types of soil need stable manure—it loosens up clay and helps sand to hold moisture.

Two and Two Make Four

If all the manufacturers of rubber tires for motor cars in the United States were to operate up to the limit of their facilities twenty-four hours per day, the aggregate production per year would be in the vicinity of 37,000,000 tires.

Not one tire company that we know of could possibly operate full facilities twenty-four hours a day, therefore the aggregate production, under the most favorable circumstances, would not and could not be above 25,000,000 tires per year.

There are now, according to United States statistics, approximately 10,000,000 motor cars in daily use in the United States. At a conservative estimate each of these cars will consume at least two new tires annually, a total of 20,000,000 tires.

The annual and normal production of motor cars in the United States is now about 3,000,000. Each of these cars requires five tires or a total annually of 15,000,000 tires.

This means a demand of 35,000,000 tires annually, not taking into consideration the constant increase in the volume of cars in use and in the annual production of motor cars.

Therefore it is certain that the making of rubber tires is and will continue to be a profitable industry.

The Wildman Rubber Co. of Bay City Surely Presents an Attractive Investment Proposition

The Wildman Self-Sealing Pneumatic Inner Tube

This is the most important advance in tire making because it places in the hands of the owners of motor cars an absolute self-sealing inner tube. Ask any motor car owner what this means. The Wildman Self-Sealing Pneumatic Inner Tube is fully covered with basic patents, both as to its design and the process of making. These are the exclusive property of the Wildman Rubber Company and literally give that company the control of the inner tube markets of the world.

If the readers of this announcement could only appreciate the mighty significance of this fact, we would be swamped with a rush of people to buy stock, because the profits which follow the possession of such a tremendously valuable and exclusive product can scarcely be imagined. Investigate.

Bay City Board of Commerce Bay City, Michigan

W. G. MacEDWARD, Secretary
J. A. JOHNSON, President. WILLARD E. KING, First Vice President
GEO. E. WEDTHOFF, Second Vice President
DAVID MILLER, Treasurer. EDWIN T. JONES, Recorder.
The Wildman Rubber Co., Bay City, Michigan:— July 21, 1921.

Gentlemen—The writer was present today at the demonstration given by your company for newspaper representatives and others, in connection with your new inner tube and was an eye-witness to all the various tests, etc., in fact I assisted in making the same.

It certainly was amazing to see ice picks, nails, and other sharp, as well as blunt, instruments driven a number of times through the casing and tube of a tire filled with compressed air, and to know that after the withdrawal of these various things there was absolutely no escape of air whatever, through the puncture.

Have had many flat tires during the number of years I have driven a car, and having those experiences in mind, the results of the tests are almost unbelievable. I assume many people would be incredulous unless they were in attendance at a demonstration, and saw what really wonderful results were achieved.

You have a most valuable asset in this much-needed tube, and there is no question in my mind but what it will advertise and sell itself in every community in which it is introduced; it fills a long-felt want and will be a boon to all owners and drivers of automobiles and trucks; undoubtedly, in many instances the invention will do away with the necessity of carrying spare tires.

All good wishes.

Very truly,
W. G. MacEDWARD,
Secretary, Bay City Board of Commerce.

The Wildman Rubber Company is a Michigan industry. It is an assured success and you are invited to become a part of that company. We could wish it possible that all the stock of the company were held by Michigan people so that the golden harvests which are sure to come could be enjoyed entirely by ourselves. If you knew as we do, all the facts, you would not hesitate to come with us now and urge your neighbors to buy our stock.

In five years from now there will be lots of people in Michigan who will say: "I had a chance to buy stock in the Wildman Rubber Company when it started."

Fill out the coupon. Let us help you to investigate and analyze the solidity of our proposition.
